Anjali Wadhwa
anjaliwa@thoughtworks.com

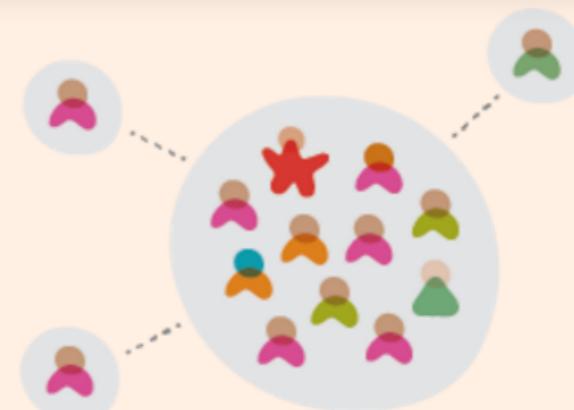

A **multi-site** team has two or more co-located groups at separate locations within a larger team, perhaps with some formal sub-team boundaries and responsibilities. A good example of this is

Remote versus Co-located Work

There isn't a simple dichotomy of remote versus co-located work, instead there are several patterns of distribution for teams each of which has different trade-offs and effective

Satellite workers occur when you have most of the team co-located, but a few members working remotely, either from home or in another office.

SQWIGGLE

Invite a Team Member...

Matt Boyd
Sqwibble Main
1 minute ago

Hey Guys, do you happen to have those mockups I was discussing w/ you earlier? I've got a presentation in a few minutes.

Eric Bieller
Sqwibble Main
15 minutes ago

 Hey Matt Boyd - here it is... I added a hot air balloon though. I tthope you don't mind, I think it's really great!

Tom Moor
Dev Ops
16 minutes ago

Hey what do you think about this code? It kinda sucks I know.. because I can't code

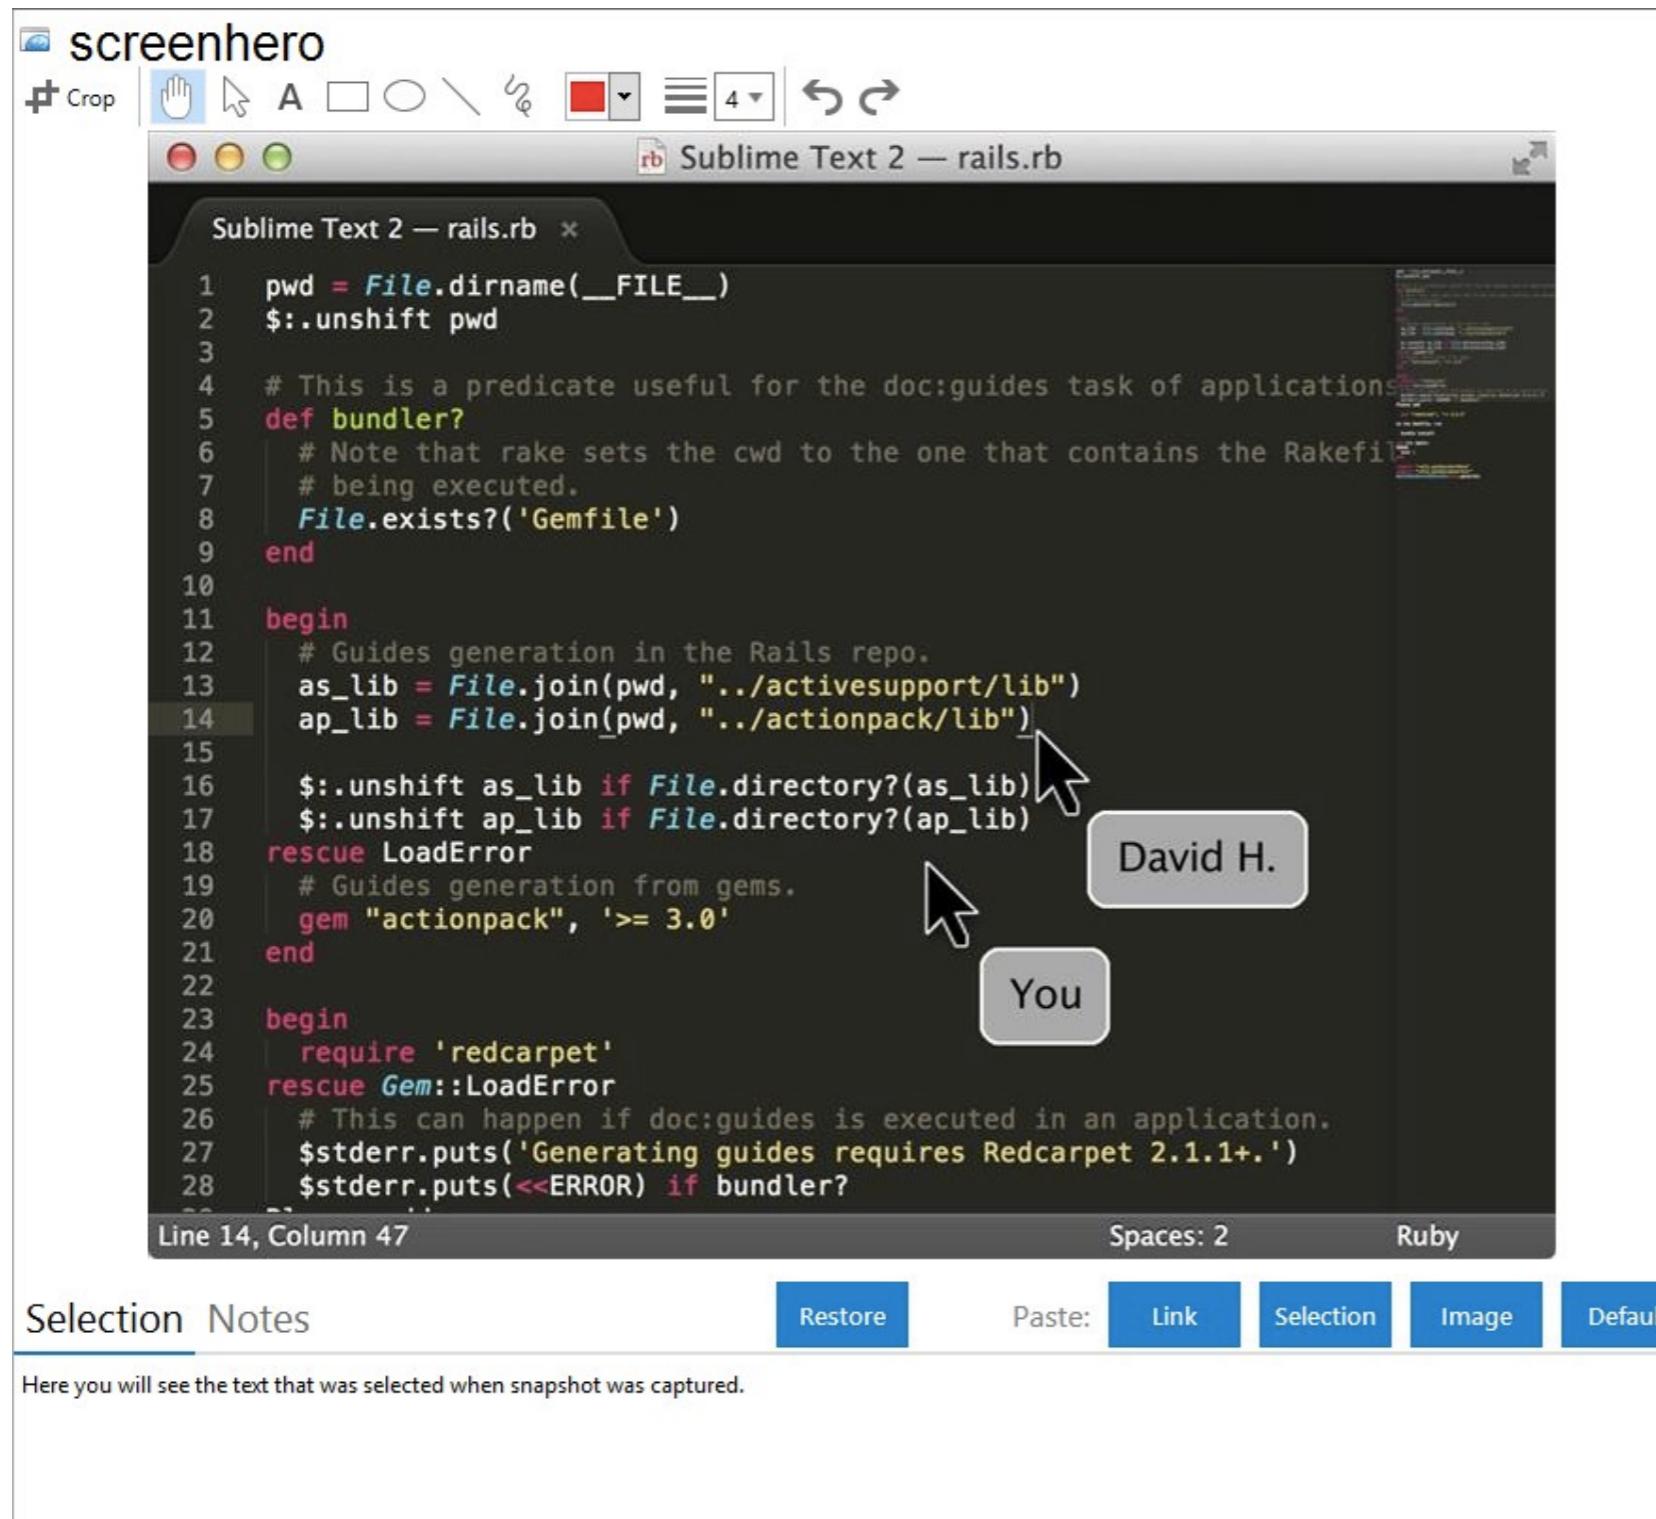

```
1. @requires_authorization
2. def somefunc(param1='', param2=0):
3.     r'''A docstring'''
4.     if param1 > param2: # interesting
5.         print 'Greater'
6.     return (param2 - param1 + 1) or
7.
8. class SomeClass:
9.     pass
```

Share something... 

The screenshot shows the Sqwibble application interface. On the left, there's a sidebar with icons for invite, team members (Matt Boyd, Eric Bieller, Tom Moor, John Smith, Ashley Jamison, Julie Abrahms), settings, and a menu. The main area has a header "Sqwibble". A message from Matt Boyd is shown: "Hey Guys, do you happen to have those mockups I was discussing w/ you earlier? I've got a presentation in a few minutes." Below it, Eric Bieller shared a "GIF" of a hot air balloon over a field. Tom Moor responded with a message and a block of Python code. At the bottom, there's a "Share something..." input field and a cloud icon. To the right, there are four video feeds: Eric Bieller at 10:56am, a man in a pink shirt, a woman with glasses, and a man in a striped shirt.

SCREENHERO

The screenshot shows the Flamory sidebar on the right side of the application. It has a search bar at the top and a "Personal" section below it. The sidebar lists several recent snapshots with their titles and thumbnails:

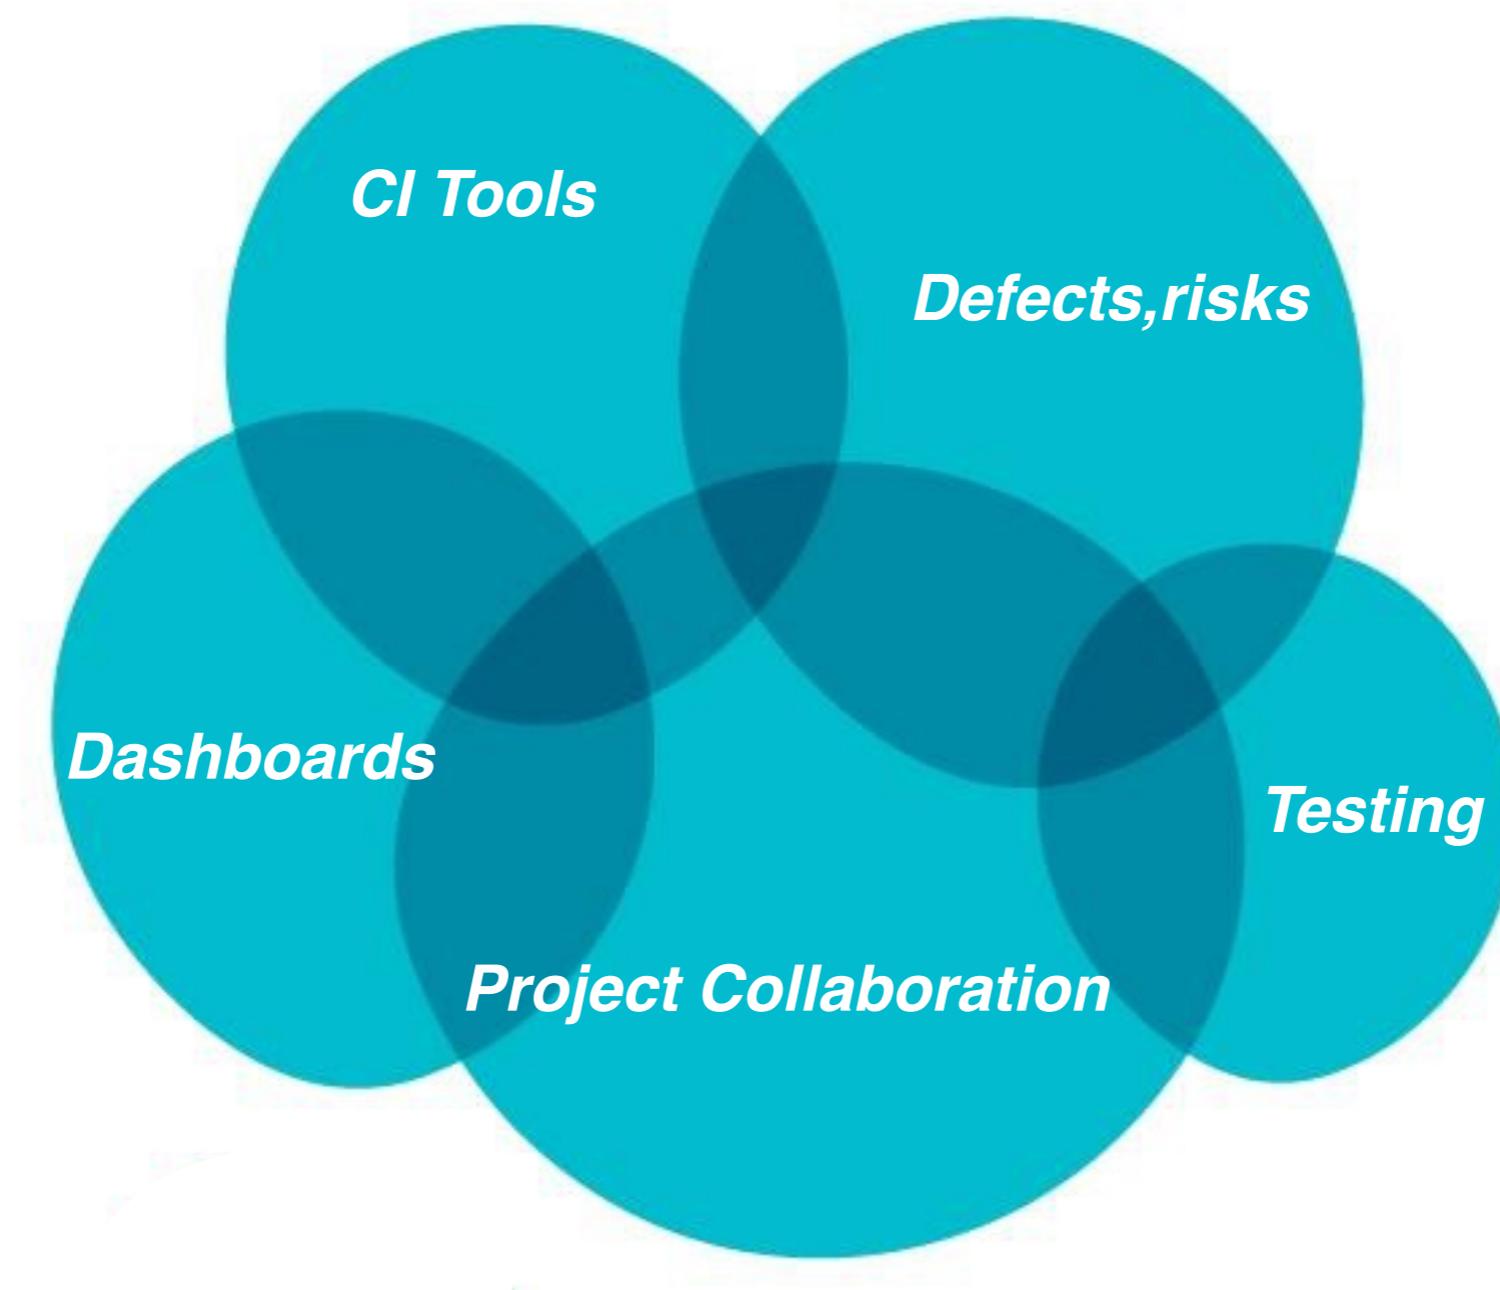

- screenhero (Thumbnail shows the current code editor view)
- Microformat - Wikipedia, the free encyclopedia (Thumbnail shows a Wikipedia page)
- Graph (mathematics) - Wikipedia, the free encyclopedia (Thumbnail shows a Wikipedia page)
- Under Frozen Tundra, an Icebreaking Ship Unco (Thumbnail shows a ship on ice)
- Semantic Web - Wikipedia, the free encyclopedia (Thumbnail shows a Wikipedia page)

A note on the right side of the sidebar states: "Vastness: The World Wide Web contains many billions of pages. The SNOMED CT medical terminology ontology alone contains 370,000 class names, and existing technology has not yet been able to eliminate all semantically duplicated terms. Any automated reasoning system will have to deal with truly huge amounts."
